DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on ***a separate sheet*** within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "***said***," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because of the use of the term "said" (i.e., line 2 and that it is not on a separate sheet of paper as required. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: The specification fails to contain the appropriate subtitles (i.e., "Summary of the Invention", "Brief Description of the Drawings", etc.). Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-24 are replete with errors under 35 U.S.C. 112, second paragraph too numerous to mention specifically; however, examples of those errors are as follows:

In claim 1, line 1, applicant claims "...or similar elements...". This phrase is inherently unclear in that it is not known what is encompassed by "similar elements" and thus not allowing one to determine the metes and bounds of the claimed subject matter. This lack of clarity renders the claim subject matter indefinite.

Throughout the claims the applicant employs the terms "them", "they", "their" and "its" (i.e., claim 1, line 5 & line 13; claim 2, line 4; claim 4, line 4). These terms are inherently unclear in that several features/limitations are mentioned prior to the term(s) and it may not be known as to which feature/limitation is being referred and thereby rendering the claimed subject matter vague. (Note: It is recommended that these terms be replaced by --said/the (feature)--)

In claim 1, line 13, applicant claims "...the parts forming...". It is not known as to what features/limitations are being referred to by "the parts" or how they related to those around/allied to them and thereby rendering the subject matter indefinite.

In claim 1, line 4, "the flanks", claim 1, line "the successive flanks", claim 1 and line 13, "the parts" appear to lack proper antecedent basis.

As mentioned above, these are **examples** of errors under 35 U.S.C. 112, second paragraph and all claims should be revisited and revised as necessary.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 7,331,402.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both the patent and the instant application lend themselves to a device for fixing blades to plate/rings and employing such on a shaft type device in a "ganged" manner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chase '099.
